

Faith and Digital Technologies: Connecting Bytes and Beliefs

Digital technology has become a ubiquitous feature of modern life, but our increasingly fast-paced world seems more distant from the world narrated in Scripture. What do bytes have to do with Christian beliefs? This Reformed Institute event will explore a Christian perspective on computer technology based on the biblical narrative.

Saturday, October 24, 2015

Lewinsville Presbyterian Church

1724 Chain Bridge Rd., McLean, VA 22101

For more information or to register, visit www.reformedinstitute.org or contact Mary Hill, Program Coordinator for the Reformed Institute, at 703.518.5125 or by email, mhill@reformedinstitute.org.

Dr. Derek C. Schuurman is visiting Associate Professor of Computer Science at Dordt College in Iowa. He spent several years working in industry before returning to academia. He enjoys teaching and doing research in the area of robotics and computer vision, but he is also a lay theologian who seeks to bring his Reformed heritage to bear on issues of faith and technology. His interest in computers began in his early teens with his first computer, a Timex-Sinclair ZX-81. Dr. Schuurman is author of the recent book ***Shaping a Digital World: Faith, Culture and Computer Technology***. He also has a blog called **Technically Speaking**.
